==========

Professional Summary:

10+ years of experience in **Software Tester**. Having **9+** years of experience on development in **Robotic Process Automation** using tool **blue prism, Selenium. TestNG, Cucumber, API Rest Assured.**

- Having knowledge on Automation Anywhere.
- Domain expertise – Insurance and Healthcare and Banking
- Proficient in Requirement Analysis, Test Planning, Estimation, Preparation and Review of Test Conditions & Test Cases, Execution of Test Cases and Defect logging & Management
- Experience in Insurance Application Testing and web application testing.
- Experience in Validation, Acceptance, Conformance, Compatibility, Functional, Unit, Integration, Regression, Performance, GUI, Back-end, Smoke Testing, Experience in the entire Software Development Lifecycle (SDLC) and Software Testing Lifecycle (STLC) from requirements gathering to releasing to production
- Experience in all phases of Software Testing Lifecycle with expertise in the Integration and Functional, User Interface, Regression testing and Smoke Testing.
- Excellent oral and written communication skills with strong problem-solving skills and a result-oriented attitude.
- Expertise in implementing an automation of various processes like extracting data from CSV, Excel files, invoice processing, order processing, service desk automation with the help of blue prism and Automation Anywhere.
- Expertise in using Image comparison using Image recognition with OCR, ICR and machine leaning for designing in blue prism and Automation Anywhere.
- Used different blue prism automation techniques to automate complex processes. (Scrapping, OCR, queues, publishing and provisioning etc.)
- Worked in Blue prism tool extensively during projects.

Technical Skills:

- Experience in **Automation Testing** within **Banking and Insurance** domains
- Advanced expertise in **Selenium WebDriver, Java, TestNG, and Cucumber (BDD)** for enterprise systems
- Strong knowledge in **Core Banking, Payments, Policy Administration, and Claims Processing**

- Proven ability in **end-to-end test automation framework design**, maintenance, and scalability
- Hands-on experience in **API testing (REST/SOAP)** using **Postman and Rest Assured**
- Expertise in **CI/CD integration**, regression automation, and continuous quality improvement
- Strong skills in **SQL, data integrity validation, and backend testing** for financial systems
- Demonstrated contribution to **quality governance, compliance, mentoring, and skills transfer**

Experience Summary:

- Worked as **Computers Quality Assurance Analyst** in **Owethu Managed Services** from January/2023 to current till.
- I worked as **Software Quality Engineer** in **QOT Solution SA** from June/2022 to December/2022.
- I worked as **Software Associate** in **Accenture** from February/2018 to April/2022.
- I worked as **Client Partner** in **Access Healthcare** from May/2015 to February/2018.

Education:

- B.SC. [Computer Science] from The American College during the year **2012 to 2015** affiliated to Madurai Kamaraj University.
- 12th State Board - from Zion Good Shepherd's Matriculation Hr. Sec School during the year 2011 to 2012, Madurai**.**
- 10th State Board - from Zion Good Shepherd's Matriculation Hr. Sec School during the year 2009- 2010

PROJECT DETAILS

Project name : IMEX
Client : ABSA
Role : Quality Assurance Engineer
Team Size : 06
Technologies : Selenium with TestNG
Duration : January/2023 to Current till

Project Description: In this Project, whether you're importing, exporting or receiving payments, our import documentary Letter of Credit will have you covered. Use our Import Documentary Collections and avoid potential losses when you import goods from abroad. Use our Export Documentary Collections and gain complete control over your payments for exports. Looking for an easy and convenient way to pay for imports and exports, plus grow your savings at the same time. In need of finance to grow your business or to import and export goods and services? Get in touch with us about Working Capital. Our Documentary Collections, Letters of

Credit, Bonds, Guarantees and Indemnities come at competitive rates, giving you an advantage in international trading.

Roles & Responsibilities:

- Extensive involvement in Automation testing process by using Selenium tool.
- Web and Excel based application automation.
- Except for handling and Problem solving.
- Experienced in Automation testing from end-to-end automation solution to the current manual work using Selenium.
- Having good skills in Documentation and Unit testing.
- Have played significant roles in all stages of Development Life Cycle.
- Have to maintain and support the process in production.

PROJECT: 02

Project name : Phanda Pusha Play
Client : ITHUBA
Role : Software Quality Engineer
Team Size : 08
Technologies : Selenium with TestNG and Cucumber
Duration : June/2022 to December/2022

Project Description: In this Project, ITHUBA Holdings (RF) Proprietary Limited was appointed as the official National Lottery operator of South Africa by the National Lotteries Commission. When we took over the National Lottery, we promised to optimize the consumer experience by reinvigorating the National Lottery's offering. Since then, we have offered bigger and better jackpots that have been won by ordinary South Africans, and as a result, our National Lottery Distribution Trust Fund contributions to socio-economic development through various good cause charity initiatives, remains impactful.

Roles & Responsibilities:

- Extensive involvement in Automation testing process by using Selenium tool with TestNG and Cucumber
- Web and Excel based application automation.
- Except for handling and Problem solving.
- Experienced in Automation testing from end-to-end automation solution to the current manual work using Selenium.
- Having good skills in Documentation and Unit testing.

- Have played significant roles in all stages of Development Life Cycle.
- Have to maintain and support the process in production.

PROJECT: 03

Project name : Insurance Management (Accenture)
Role : Software Associate
Team Size : 05
Technologies : Blue prism
Duration : February/2018 to April/2022

Project Description: In this project we will get everyday emails in Excel Sheet with Customer details (Bulk Details) (first name, last name, Invoice number, DOB, SSN number, Loan documents, Terms, Loan amount, Loan amount, business Rules details.). We need to retrieve data from Excel Sheet and send an Email to every customer on their Personal e-mail id. Manually it takes Lots of work and chances are there for human error, so we are automating the process of Insurance Company and Implemented the RPA Project. Project includes **Excel automation**, **web automation, Email automation** and **Windows applications.**

Roles and Responsibilities:

- Extensive involvement in Robotic Process Automation development process by using Blueprism tool.
- Web, Windows and Excel, Email based application automation.
- Except for handling and Problem solving.
- Analyzing the problems and implementing the processes to improve.
- Innovative ideas to reduce the time span of a process.
- Hands on experience in creating Windows Application.
- Experienced in development from end-to-end automation solution to the current manual work using blue prism.
- Have played significant roles in all stages of Development Life Cycle.
- Having good skills in Documentation and Unit testing.
- Have to maintain and support the process in production.

PROJECT: 04

Project name : Payroll Processing (Access Healthcare)
Role : Client Partner
Team Size : 05
Technologies : Blue prism
Duration : November/2016 to February/2018

Project Description: In this we get the employee details like working hours and their salary information in an excel sheet from the client. We fetch the details into an windows application.

For the client requirements, we will perform the task for the employee's salary on their respective norms like (weekly basis and monthly basis) and transfer the output data from window application to excel and sent it to manager through mail.

Roles & Responsibilities:

- Extensive involvement in Robotic Process Automation development process by using Blueprism tool.
- Web, Windows and Excel, Email based application automation.
- Get the Employee details working in a particular unit from worksheet.
- Exception handling and Problem Solving.
- Feeding the employee data in the web and getting the details of the employee's pay allocation through an application.
- Have played significant roles in all stages of Development Life Cycle.
- Having good skills in Documentation and Unit testing.
- Have to maintain and support the process in production.

PROJECT: 05

Name : Claims Eligibility (Access Healthcare)
Role : Developer
Team Size : 04
Technologies : Blue prism
Duration : May/2015 to October/2016

Project Description: In this Project we get the input as Policy ID, Policy holder name, SSN, from the Client through Excel Sheet. We fetch the data by using RPA tool and automate the client web application and fetch the input details as policy id and name in the web and read the Eligibility Information like Policy Effective date and Current policy status and update the output information to the other Excel Sheet and the send the output Excel and success mail to the manager. This is a repeated process so that we automate the process by using RPA. Project includes Excel automation, web automation, Email automation and Windows applications.

Roles & Responsibilities:

- Extensive involvement in Robotic Process Automation development process by using Blueprism tool.
- Web, Windows and Excel, Email based application automation.
- Except for handling and Problem solving.
- Experienced in development from end-to-end automation solution to the current manual work using Blue prism.
